2:30pm - 4:00pm	LEGO® Workshop #2, Challenges and Play

LEGO® Stop-Motion & Animation with 3D Printing:

Want to see your child's stories come to life? Campers will create their very own movies using LEGO® through the process of stop motion capture; and learn basic animation concepts. Their movies will come to life with the addition of music, special effects and professional titles! We have many LEGO® themes to choose from: Super Heroes, Ninjago®, Star Wars®, LEGO® Friends® ...etc. With the new 3D Printing revolution the possibilities of what can be created are amazing and endless. Campers will be introduced to the world of 3D Printing and use a 3D Pen to create their own design. Campers will get to use a 3D printed character in their movies and will take home the character. Age 5+

Robotic with Lego® Mindstorms:

Our most popular camp! Learn to design, build and program robots! Campers work both individually and in small teams using the LEGO® Mindstorms Robotic Kit; and participate in the various challenges throughout the week. Age 5+.

NEW Lego® Tech Engineering with 3D Printing:

Designed to excite kids on engineering by engaging them in logical & creative thinking and out-of-the-box problem solving. Throughout the week campers will be working on many different projects which include Lego Engineering projects, Stop Motion Videos and LEGO® Mindstorms®. With the new 3D Printing revolution the possibilities of what can be created are amazing and endless. Campers will be introduced to the world of 3D Printing and use a 3D Pen to create their own design. Age 5+.
